#### YOGA

#### (Two hours)

Answers to this Paper must be written on the paper provided separately.

You will not be allowed to write during the first 15 minutes.

This time is to be spent in reading the question paper.

The time given at the head of this Paper is the time allowed for writing the answers.

Attempt all questions from Section I and two questions each from Sections II, III and IV.

The intended marks for questions or parts of questions are given in brackets [].

#### **SECTION I (40 Marks)**

Attempt all questions from this Section

Quest		
Fill in (a)	the blanks: Endocrine glands secrete into the bloodstream for transport to	[1]
	target organs.	
(b)	is a condition in which objects which are at far distance appear	[1]
	blurred.	
(c)	The urine is intermittently emptied from the urinary bladder to the outside of	[1]
	body through the	
(d)	Each kidney contains over one million tiny blood processing units called	[1]
(e)	Over secretion by the gland causes gigantism.	[1]
(f)	The mitral valve is also known as the valve.	[1]
(g)	The only vein that carries oxygenated blood is vein.	[1]
(h)	hormone increases reabsorption of water from the kidney tubules.	[1]

#### This Paper consists of 6 printed pages.

### Question 2

State whether the following statements are *true* or *false*:

<ul> <li>coordinate muscular activity.</li> <li>(e) Practice of Shirshasana improves blood circulation particularly the moveme of blood along the veins.</li> <li>(f) In human eyes the yellow spot is the area of no vision and the blind spot is the area of best vision.</li> <li>(g) The diencephalon in the brain is made up of pons and medulla oblongata.</li> <li>(h) Kidneys are the primary excretory organs that eliminate nitrogenous was chiefly urea from the blood. <b>Class Result:</b></li> <li><b>Question 3</b></li> <li>Choose the correct answer from the options given in the brackets:</li> <li>(a) The asana that is the most calming for the nerves is (Urdhw Dhanurasana, Sarvangasana, Marichyasana III)</li> <li>(b) carry / carries waste from the kidney to the bladder. (Urethr Ureters, Renal pelvis)</li> <li>(c) The is a portion of the nephron between the loop of Henle and the collecting duct. (Bowman's Capsule, Distal convoluted tubule, Proxim convoluted tubule)</li> </ul>		8	
<ul> <li>(c) Red blood cells are responsible for blood clotting.</li> <li>(d) The main function of cerebrum is to maintain balance of the body ar coordinate muscular activity.</li> <li>(e) Practice of Shirshasana improves blood circulation particularly the moveme of blood along the veins.</li> <li>(f) In human eyes the yellow spot is the area of no vision and the blind spot is the area of best vision.</li> <li>(g) The diencephalon in the brain is made up of pons and medulla oblongata.</li> <li>(h) Kidneys are the primary excretory organs that eliminate nitrogenous was chiefly urea from the blood. <b>Result 1</b> <i>Conse the correct answer from the options given in the brackets:</i></li> <li>(a) The asana that is the most calming for the nerves is (Urdhw Dhanurasana, Sarvangasana, Marichyasana III)</li> <li>(b) carry / carries waste from the kidney to the bladder. (Urethr Ureters, Renal pelvis)</li> <li>(c) The is a portion of the nephron between the loop of Henle and the collecting duct. (Bowman's Capsule, Distal convoluted tubule, Proxim convoluted tubule)</li> <li>(d) The systolic value of blood pressure in normal healthy humanian of the systolic value of blood pressure in normal healthy humanian of the systolic value of blood pressure in normal healthy humanian convoluted tubule.</li> </ul>	(a)	Phagocytosis is a function of platelets.	[1]
<ul> <li>(d) The main function of cerebrum is to maintain balance of the body ar coordinate muscular activity.</li> <li>(e) Practice of Shirshasana improves blood circulation particularly the moveme of blood along the veins.</li> <li>(f) In human eyes the yellow spot is the area of no vision and the blind spot is the area of best vision.</li> <li>(g) The diencephalon in the brain is made up of pons and medulla oblongata.</li> <li>(h) Kidneys are the primary excretory organs that eliminate nitrogenous was chiefly urea from the blood. <b>Result in Constant State State</b></li></ul>	(b)	The inner portion of the spinal cord consists of gray matter.	[1]
<ul> <li>coordinate muscular activity.</li> <li>(e) Practice of Shirshasana improves blood circulation particularly the moveme of blood along the veins.</li> <li>(f) In human eyes the yellow spot is the area of no vision and the blind spot is the area of best vision.</li> <li>(g) The diencephalon in the brain is made up of pons and medulla oblongata.</li> <li>(h) Kidneys are the primary excretory organs that eliminate nitrogenous was chiefly urea from the blood. <b>Class Result in Constitution of the asana that is the most calming for the nerves is</b> (Urdhy Dhanurasana, Sarvangasana, Marichyasana III)</li> <li>(b) carry / carries waste from the kidney to the bladder. (Urethr Ureters, Renal pelvis)</li> <li>(c) The is a portion of the nephron between the loop of Henle and the collecting duct. (Bowman's Capsule, Distal convoluted tubule, Proximic convoluted tubule)</li> <li>(d) The systolic value of blood pressure in normal healthy humanical astronameters.</li> </ul>	(c)	Red blood cells are responsible for blood clotting.	[1]
<ul> <li>of blood along the veins.</li> <li>(f) In human eyes the yellow spot is the area of no vision and the blind spot is the area of best vision.</li> <li>(g) The diencephalon in the brain is made up of pons and medulla oblongata.</li> <li>(h) Kidneys are the primary excretory organs that eliminate nitrogenous was chiefly urea from the blood. <b>Result:</b></li> <li>(g) The asana that is the most calming for the nerves is (Urdhwe Dhanurasana, Sarvangasana, Marichyasana III)</li> <li>(b) carry / carries waste from the kidney to the bladder. (Urethre Ureters, Renal pelvis)</li> <li>(c) The is a portion of the nephron between the loop of Henle and the collecting duct. (Bowman's Capsule, Distal convoluted tubule, Proximic convoluted tubule)</li> <li>(d) The systolic value of blood pressure in normal healthy humania.</li> </ul>	(d)	The main function of cerebrum is to maintain balance of the body and coordinate muscular activity.	[1]
<ul> <li>area of best vision.</li> <li>(g) The diencephalon in the brain is made up of pons and medulla oblongata.</li> <li>(h) Kidneys are the primary excretory organs that eliminate nitrogenous was chiefly urea from the blood. <b>Constant Science State State</b></li></ul>	(e)	Practice of Shirshasana improves blood circulation particularly the movement of blood along the veins.	[1]
<ul> <li>(h) Kidneys are the primary excretory organs that eliminate nitrogenous was chiefly urea from the blood. Class Result in Class Result</li></ul>	(f)	In human eyes the yellow spot is the area of no vision and the blind spot is the area of best vision.	[1]
<ul> <li>chiefly urea from the blood.</li> <li>Question 3</li> <li>Choose the correct answer from the options given in the brackets: <ul> <li>(a) The asana that is the most calming for the nerves is (Urdhw. Dhanurasana, Sarvangasana, Marichyasana III)</li> </ul> </li> <li>(b) carry / carries waste from the kidney to the bladder. (Urethr. Ureters, Renal pelvis)</li> <li>(c) The is a portion of the nephron between the loop of Henle and the collecting duct. (Bowman's Capsule, Distal convoluted tubule, Proxime convoluted tubule)</li> <li>(d) The systolic value of blood pressure in normal healthy human</li> </ul>	(g)	The diencephalon in the brain is made up of pons and medulla oblongata.	[1]

	(c)	The is a portion of the nephron between the loop of Henle and the collecting duct. (Bowman's Capsule, Distal convoluted tubule, Proximal convoluted tubule)	[1]
	(d)		[1]
(e) carries impulses from one hemisphere of the cerebellum to the	(e)	carries impulses from one hemisphere of the cerebellum to the	[1]

other hemisphere and coordinates muscular movements on both the sides of the body. (Forebrain, Pons, Spinal Cord)

- (f) The protective layer covering the heart is known as \_\_\_\_\_. (*Pleura*, [1]
   *Pericardium*, *Piamater*)
- (g) When the lens of the eye turns opaque it causes a condition called [1] . (Night blindness, Colour blindness, Cataract)
- (h) Glucagon is a hormone produced by the \_\_\_\_\_ cells. (Alpha, Delta, [1] Beta)

#### **Question 4**

Match the items in the two columns given below:

(a)	Hind Brain	(i) Vein	[1]
(b)	Glomerulus	(ii) Ultrafiltration	[1]
(c)	Narrow lumen	(iii) Ear Ossicles	[1]
(d)	Stirrup	(iv) Pons	[1]
(e)	Forebrain	(v) Artificial kidney	[1]
(f)	Dialysis	(vi) Artery	[1]
(g)	Wide lumen	(vii) Lymph glands	[1]
(h)	Tonsils	(viii) Thalamus	[1]

#### **Question 5**

Select the odd one out:[1](a) Night-blindness, Astigmatism, Hyperopia, Deafness.[1](b) Cerebrum, Cerebellum, Capillaries, Pons.[1](c) Simple goitre, Exophthalmic goitre, Myxoedema, Diabetes Insipidus.[1](d) Urethra, Uterus, Urinary Bladder, Urethra.[1]

(e)	Serum, Acetylcholine, Plasma, Lymph.	[1]
(f)	Hepatic vein, Renal vein, Aorta, Vena Cava.	[1]
(g)	Dura mater, Pia mater, Gray matter, Arachnoid	[1]
(h)	Liver, Pituitary, Thyroid, Adrenal	[1]

#### SECTION II (20 Marks)

#### Answer any two questions from this Section

#### **Question 6**

With respect to Ved Vyasa answer the following questions:

- (a) Write notes on the following works of *Ved Vyasa*: [8]
  - (i) Brahman Sutras
  - (ii) The Mahabharata

## (iii) The Bhagwatam (iv) The Puranas SSRESUT

[2]

(b)	What was his relationship with the following people:	
-----	--	--

- (i) Satyavati
- (ii) The Pandavas

#### **Question 7**

With respect to Narsi Mehta answer the following questions:

- (a) Write about any three miracles that happened during Narsi's life that prove his [6] greatness to us.
- (b) Write notes on Narsi's composition *"Vaishnav Jan To Tene Kahiye je..."* [2]
- (c) Narsi's life teaches us the importance of having faith in the existence of God. [2] How important is faith to you? Why?

#### **Question 8**

With respect to Yajnavalkya write about the following:
(a) His relationship with Vaisampayana and the Krishna Yajurveda. [4]
(b) His relationship with King Janak. [2]
(c) His relationship with Surya Bhagwan and the Shukla Yajurveda. [2]
(d) His relationship with Gargi and the Yoga Yajnavalkya Samhiti [2]

#### **SECTION III (20 Marks)**

Answer any **two** questions from this section

#### **Question 9**

Explain the following terms	with reference to Patanjali's Yoga Sutras.	[10]
Explain the following terms	with reference to rutanjun 5 rogu Suttus.	[10]

- (a) Vairagya
- (b) Sabija Samadhi
- (c) Avidya
  (d) Chitta Prasadanam SRESUTIN
  (e) Swadhyaya

#### **Question 10**

T19	841 5	Turn Over	
(c)	Explain the term Ishwar Pranidhan as explained to us in Patanjali Yoga S	Sutras.	[2]
(b)	Write a short note on Kriya Yoga of Sage Patanjali.		[3]
	What are the three aspects that constitute Samyama?		
	Explain Samyama.		
(a)	In the third pada of sage Patanjali's Yoga Sutra he mentions Samyama.		[5]
Que	stion 11		
(0)	white in detail on any tinee rintarayas.		[0]
(c)	Write in detail on any three Antarayas.		[6]
(b)	State the names of all the Antarayas as per Sage Patanjali's Sutra 1.30.		[3]
(a)	What is the meaning of Antarayas or Chitta Vikshepas?		[1]

#### **SECTION IV (20 Marks)**

#### Answer any **two** questions from this section

#### Question 12

(a) With respect to Samkhya Philosophy explain the following:

	(i) Purusha	[2]
	(ii) Prakriti	[2]
	(iii) Gunas	[2]
	(iv) Gyan Indriyas	[1]
	(v) Karma Indriyas	[1]
(b)	(i) Who is the founder of the Purva Mimamsa and School of Philosophy?	[2]
	(ii) Who is the founder of the Uttar Mimamsa School of Philosophy?	

# Question 13 Question 13 (a) Write Sage Patanjali Yoga Sutra 2.3 in Sanskrit and explain it word by word.

(b) Write the Yoga Sutra of Sage Patanjali which gives us the definition of Yoga. [5]Write this sutra in Sanskrit with its sutra number and explain it word by word.

[5]

#### **Question 14**

Compare the Buddhist and Jain schools of Philosophies. [10]
